## Trusted materials is the key to producing a capable boot

A high standard of quality and comfort is our priority at Nora Boots. Using cutting-edge technology and reliable and trusted materials is the key to producing a boot capable of facing even the most unpredictable circumstances. Nora Boots have become symbol of Italian excellence in the safety boot industry.

### Polyurethane Elastopan® by BASF

The quality of a boot depends on a variety of factors, but the most important one is the material chosen to produce them. Boots made from Elastopan® guarantee maximum flexibility, excellent thermal insulation and low density.
